PROFESSIONAL SUMMARY

Versatile full-stack developer with a focus on Laravel, React/Angular, Node.js/NestJS, and AWS. Leveraged AI technologies, integration and workflow automation, building n8n/Make.com pipelines and applications powered by the Anthropic Claude API and Google Vertex AI. Recently certified across the Anthropic AI Fluency and Claude developer curriculum, Google Cloud Generative AI tracks, and AWS prompt engineering fundamentals. Proven track record delivering production systems for HR, e-commerce, and brand-protection use cases, with strong cross-team collaboration experience and client-facing.

WORK EXPERIENCE

Full Stack Developer — *Synergy360 Ltd* Jan 2025 – June 2026

- Develop and maintain a Laravel-based platform, covering feature development, monitoring, and SEO implementation.
- Design and build AI-integrated workflow automations using n8n and Make.com, including a multi-workflow DMCA brand-abuse monitoring system with domain enrichment and automated follow-ups.
- Build and integrate applications with the Anthropic Claude API and Google Vertex AI, and implement Model Context Protocol (MCP) tooling.
- Develop automated test suites using Playwright (TypeScript) and Python-based web scraping pipelines.
- Build and maintain a headless CMS platform using Payload CMS with Next.js.
- Deploy and manage cloud infrastructure on AWS, including Amplify, Lambda, S3, ElastiCache, Aurora and RDS.

Front-End Angular Developer — *ELCA Ltd* Oct 2023 – Nov 2024

- Maintained the LAGAPEP project through end-of-lifecycle support and bug fixes.
- Developed reusable components in Angular 13 (TypeScript) and implemented a new export feature on the RIA project.
- Led migration and implementation of a new Angular 18 project.
- Resolved major SonarQube code-quality issues and built automated tests with Playwright.
- Gathered client requirements directly with stakeholders in Germany and coached an incoming intern.
